

## MediaPOINTE DMR

The DMR records audio and video in standard definition and can be upgraded to the DMR Studio, which combines up to 2 video inputs for a multi-image recording. This flexibility enables users to meet their capture, archive, and streaming requirements today while providing an ongoing upgrade path to tomorrow.

### FEATURES & BENEFITS

- The DMR products capture and stream audio/video content in many customizable formats. Salespeople can watch new product announcements live from the road, students can watch lectures they missed, and new employees can watch safety and training videos, all from their PC or iPod™.
- The DMR automatically posts recordings to the MediaPOINTE Ensemble content management server so that users can easily find and view content- YouTube™ for your organization. See MediaPOINTE Ensemble data sheet for more information.

- The DMR contains MediaPOINTE's proprietary CopyME! technology- content can be downloaded onto a USB flash drive or DVD ROM. With this capability, users can quickly distribute copies of their content anytime...anywhere.
- Video-On-Demand (VOD) functionality can be extended to the base and Studio versions of the DMR as a software option. Users can operate their DMR as a Video on Demand player to access live events or recorded content from other DMR's or DMR HD's.

### APPLICATIONS

- Education: Record presentations, lectures, class projects, debates, and staff meetings. Automatically post content to school server or MediaPOINTE Ensemble- staff and students can watch content from their PC or iPod device.
- Healthcare: Create video based training by recording video of medical procedures and mock surgeries. Stream the surgery footage to medical facilities around the world.
- Corporate: Record company announcements, training sessions, videoconferences, and meetings.
